DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "the system" in both claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 7 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rocca as what is shown is a tool with an inner working portion (100) and an outer working portion (76) that can be of any well known shape, e.g. square.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over any of Stellan, Parsons or Rocca.

Art Unit: 3723

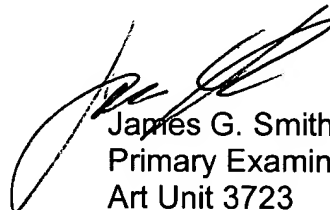

Stellin and Parsons show the claimed invention except for the exact size of the working portions of the tool and the mating portions of the fastener, however to size any tool or fastener to fit a particular need is well within the level of skill of a person skilled in the art at the time the invention was made, therefore to modify Stellin or Parsons by using a specific size for the openings in the fastener and the working portions of the corresponding tool is obvious.

Rocca also shows the use of working inner and outer portions and to use such with a corresponding fastener of the same shape and to size it to fit any need is also obvious.
